

This manual multiport filter valve features a flow rate of 17.6 gpm and utilizes a corrosion resistant gasket for opening and closing functions.

It can be used as a service, backwash, and fast rinse valve, even under pressure.

With a handle, you can switch the settings easily without turning off the pump or the power.

When selecting a valve setting, make sure to always depress the handle before turning.

Model	F56A1/A2 (51104/51204)
Handle material	Metal/plastic
Mount type	Top mount
Inlet/outlet	1" F
Drain	1" F
Mounting base	2.5"-8NPSM
Riser pipe	1.05" OD
Flow rate	17.6 GPM
Filter tank	6"--12"
Water pressure	up to 87 psi
Water temperature	41-122°F
Water turbidity	<20FTU
Application	Activated carbon filter, sand filter
Filter media	Quartz sand, activated carbon
