

NEOPRENE ZIP-UP TANK JACKETS

Our exclusive water softener jackets are designed specifically to insulate the softener tank against ambient temperature fluctuations. This reduces the possibility of moisture developing on the outside of the softener as well as provides a touch of style to your whole home water softener or backwash filter. Also, with our black neoprene jackets, there is no added worry of dents or dirt affecting the look of your softener tank.

- Wide variety of sizes
- Keep your resin/media tank dry and in great condition
- Full length back zipper, easy to apply onto already installed tanks
- Easy to remove for machine washing
- Available with or without logo
- Custom silk-screened logo available for additional cost
