

Prepare Pipes for Winter's Harshest Weather

Insulation

Available in a variety of sizes and materials such as fiberglass, Zeston-type fiberglass for fittings, foam armaflex, k-flex, and fasco cell options. We have what you need to protect tubing and pipe, elbows, tees, and fittings before cold weather hits.

Pipe Wrap

Simple-to-use and flexible for tight spaces and varying pipe diameter, pipe wrap is available as a self-adhesive foil and foam, as foil-backed fiberglass, and in tape form. They also reduce pipe sweating, dripping, and can reduce heat loss.

Heat Trace TruckPak

The Raychem TruckPak includes 50 feet of 3-watt/foot electric heating cable, two Frostex 9800 plug kits, and one roll of 9610 application tape. With a self-regulating conductive core, the cable reacts to temp fluctuations to protect pipes before they freeze. Features a ground-fault protect plug, end cap, and power indication light.

Hot Shot Thawing

Hot-Shot Model 400 and Model 320

Made by General Wire, the machine plugs into any 115 volt receptacle. The 400 model will thaw up to 175 feet of pipe. The 320 will thaw up to 100 feet. Works with pipes up to 1.5" diameter and is easy to store, easy to carry, and easy to use.
