

## Sani-System

Equipment should be sanitized regularly to eliminate bacteria. This EPA registered, NSF approved sanitizer delivers reliable, effective sanitization for water softeners and reverse osmosis units.

Kills harmful bacteria without chlorine, acids, or oxidizers.

Each packet of concentrated formula works in just sixty seconds. Available in pre-measured doses.

## Softener Repair Parts

Keep extra spare parts on hand for fast emergency repairs such as seals, spacers, and replacement pistons.

## UV Bulbs

We can match any manufacturer of UV bulb. For accuracy in matching up the bulb to your existing system, just give us a call or send us an email.
