## FEATURES/BENEFITS

Lead-free brass valve body for superior strength and durability

Continuous service flow rate of 106 GPM with a backwash of 36 GPM

Backwash capability accommodates softener tanks up to 36 " and filter up to $24^{\prime \prime}$ in diameter

Fully adjustable 3- or 5-cycle control for efficient and reliable water treatment system

## OPTIONS

Filter or softener control valves
Downflow co-current or upflow counter-current regeneration
No hard water bypass piston
Brine cam auxiliary switch
Electromechanical timer auxiliary switch

Hot water
Treated water regeneration
Versatile top or side mount
Electromechanical 7- or 12-day time clock, meter delayed, or meter immediate regeneration

VALVE SPECIFICATIONS

Designed for single or multiple tank systems

Environmental protective cover for water resistance, corrosion resistance, and UV stability

Time-tested, hydraulically-balanced piston for service and regeneration
